

## MIRRAT Tariff 2018

Dear Terminal User,

As we approach year end, Melbourne International RoRo & Automotive Terminal (MIRRAT) is preparing for full operations at Webb Dock West (WDW) commencing January 1, 2018. A key milestone of this preparation is the setting of our reference tariff. The tariff has been set taking into consideration the costs associated with commencement of full operations and can be found [here](#). The tariff will take effect on January 1, 2018.

MIRRAT is aware of the sensitivities around tariffs and the influence they have on industry and the supply chains of your customers. MIRRAT will adopt an open approach to our pricing process, rationale and communication to all users of our facility. To date we have invested heavily into the major upgrade and expansion of the Auto and RoRo facilities in Melbourne. MIRRAT works continuously on process improvements and innovation to deliver a service of the highest level in a cost-efficient and environmentally responsible manner.

2018 brings many exciting and significant changes at MIRRAT. Our facility footprint will double in size to facilitate the consolidation of the Auto and RoRo trades in Melbourne to a single precinct. We will also be undertaking additional upgrade works to the existing infrastructure of WDW in line with industry consultation. These upgrades will continue to deliver enhanced safety, quality, efficiency, and operational turnaround times to our customers.

We are looking forward to working with all terminal users and stakeholders in delivering a world class terminal facility all Victorians can be proud of.

For any questions or clarification please feel free to contact me directly.
